Uplay C++ Programmer (f/m)

This position will be located at **Ubisoft Blue Byte, Düsseldorf (Germany)**.

Job summary:

As a C++ programmer (f/m) on the Uplay team you will be a link between the games and the gamers with challenges for both client and server side development. The quality of your work will affect and be experienced by millions of users worldwide. The team is characterized by passion, high demand and the will to create the best for the consumer. We are among the best and we expect you to share and take pride in that challenge.

Uplay is all about gamers. Our mission is to create a place where we play, share and win together. And we need YOU to bring it to life! Uplay is the way to get exclusive content, games and lots more. Millions of players all over the world use Uplay to launch and manage their favorite games. Do you want to enhance the game experience for millions of players?

Responsibilities:

- Design and implementation of new systems, while improving systems in place
- C++ programming
- Scalability, stability, and security testing of services

Qualifications

- Excellent programming skills in C++
- Experience in SQL databases
- Good knowledge in Javascript
- Deep understanding of Software Engineering principles
- Strong ability for analyzing and extending existing code
- Excellent teamwork abilities
- Great interpersonal and communication skills; we integrate directly with teams around the world
- Fluent in English
- Self-organized and structured working attitude

Pluses

- Experience of server programming
- Experience in high- and low level scalability issues
-
