### Job-Beschreibung

Do you want to work at scale? As part of our Backend Operations team, you will be responsible for services used by millions of players all around the world. You will work closely with our developers to run in house and open source solutions. Most of them are running on our own Hardware in datacenters in Hamburg and overseas because we love to know every corner of our systems.

#### Your profile:

- Some years professional experience administering \*nix systems
- Comfortable with using various command line tools e.g. (d|net|vm|io)?stat
- Proficient in at least one scripting language
- Open and friendly communication style
- Good English skills

#### Our technologies:

- KVM, LVM, Debian, Puppet
- MySQL (Percona, Galera Cluster), PostgreSQL, Redis, Memcached, RabbitMQ
- nginx, Tomcat, Jetty, Django
- Python, Java, PHP, Go
- Graphite / Grafana, Nagios, Sentry, ELK stack
- git, Jenkins, Maven, Docker
- Slack, Jira, Confluence, Bitbucket, Gitlab
