Job-Beschreibung

Do you like Games?

☐Are you interested in sports?

Watching football is no longer just a topic for people interested in sports. The crowd is paying more and more attention on gaming – even spend money on it. That's why SOCIAL GAMING is worth to connect to live broadcasted football matches. GOALENT will run GOALBINGO.de / GEsports in App-Stores as a Social Gaming Platform / -APP that is exclusively using live data of the ball and the goal on the pitch. GOALENT is 2nd screen entertainment during live football matches, which will boost up amongst social media platforms.

GOALENT is inancially backed by a FIFA Licensed Goal Line Technology System, a former

world class football player and todays football manager, an international gaming expert and an international Investment Group. We startup developing a disruptive mobile solution that helps app publishers all over the globe to generate more revenue. Our mission is to develop technologies that reach billions of smartphone and web users in a rapidly growing gaming market.

If you want to be part of the NEXT BIG THING in App Entertainment and work with some of the best people in the gaming industry, then go for it and send us your application!

Immedialtely// unlimited contract

We are looking for a talented and experienced Senior Backend Engineer to come join our team and develop amazing games with us.

You will manage the architecture of our backend system with our Product department and will be in charge of the following:

Responsibilitiesas a Backend Engineer:

- Design, implement and maintain our online services
- Support and buildup your team
- Architecture for the robust framework for future games and player interaction
- Technical impact into the game development and live service
- Mentor your team members to drive technical excellence
- Write and maintain software system documentation

Qualifications:

- Minimum 3+ years experience working as Backend Engineer
- Fluent in Java
- Distributed systems experience
- Networking experience in TCP / IP
- Experience designing HTTP REST APIs
- Relational database development experience (e.g., MySQL, Postgres)
- Passionate about videogames

Required skills:

- Linux development experience
- Microservices architecture (Docker, Orchestration)
- Messaging middleware experience (RabbitMQ, Kafka)
- Well-organized, fast learner with an agile approach to design
- Team player comfortable with receiving feedback from multiple stakeholders
- Regarding our international team: Fluency in written and spoken English
-
