Seite 1 von 2

- Participate in design and code reviews with the software team.

- Create in-house authoring and debugging tools.

What you will bring

- Strong knowledge and experience in the Unity engine.

- Strong knowledge of c#.

- Professional experience is a plus.

- Previous experience working in the VR games industry or in the context of Escape Games is a plus.

- You need a work permit in Germany or a European citizenship

What we offer

- An increasing variety of different projects to work on

- A company that focuses on work done instead of time spent

- Flexible work hours and home office

Who we are

GameExPro is was founded in 2019 by senior and veteran Members of the Games Industry. We focus on two main pillars of activity. On the one hand we provide consulting Services to other Studios in Germany, France and other parts of Europe. On the other hand, we develop projects of our own, focusing on VR experiences and co-productions with other studios. Working with us means working in a variety of different genres and platforms in an increasingly international setting.

Work starts in November in Berlin.
