Job-Beschreibung

Level up!

Nintendo Co., Ltd., headquartered in Kyoto, Japan, has been providing a wide range of entertainment products and experiences since its founding in 1889, beginning with the manufacture and sale of Hanafuda playing cards. Since the 1983 release of the Family Computer (Famicom) system in Japan, and continuing through Nintendo Switch 2, Nintendo's focus has been the development, manufacturing, and sale of its gaming systems and software.

At Nintendo, we bring together employees with a wide range of characteristics and work together towards a common goal – to put smiles on the faces of people all over the world.

Quinke Networks GmbH
Bei den Mühren 70
D-20457 Hamburg

Tasks

- Designing, implementing, documenting, and optimising cloud and enterprise network solutions
- Administering, operating, and maintaining cloud-based and on-premise IT infrastructure
- Monitoring and maintaining cloud networking components and infrastructure services
- Troubleshooting and resolving issues in cloud environments and network infrastructures
- Providing technical support, guidance, and advice to users and stakeholders
- Analysing system performance, security, and reliability, making recommendations for improvements
- Ensuring secure and efficient network operations, including IP addressing, routing, firewalls, DNS, DHCP, and VPN management
- Working with cross-functional teams to identify and implement technology solutions that enhance business operations
- Staying up to date with the latest trends in cloud computing, automation, and network security
- Contributing to internal and cross-functional projects to drive innovation and process improvements

Requirements

- Bachelor's degree (or higher) in an IT-related field (e.g., Computer Science, Network Engineering, or similar)
- Profound skills in the area of network standards & architectures
- Knowledge of networking concepts, such as TCP/IP, DNS, and VPN
- Experience in managing and operating enterprise network environments with core network service technology, e.g. VPN, DNS, DHCP, MPLS, SD-WAN, OSPF, BGP, Proxy, etc.
- Profound knowledge of routing and global peering
- Profound knowledge in Software-defined networking (SDN) and SD-WAN
- Experience in automation, infrastructure as a code (IaC), cloud-related common programming, scripting and code development
- Advanced experience with firewalls and firewall policies
- Hands-on attitude and holistic approach
- Strong analytical skills as well as ability to work solution-oriented, structured and to think outside of the box
- Ability to work in a fast-paced, collaborative environment with cross-functional teams
- Good team working skills and willingness to work and perform in a modern multi-national / inter-disciplinary team across Europe
- Excellent communication skills, both verbal and written
- Fluency in written and spoken German and English

Please bear in mind that it might be a Senior position depending on your professional experience.

Are you interested? We look forward to receiving your application, including your earliest possible starting date and salary expectation.
