### Job description

Limbic Entertainment is seeking a talented Junior Programmer VR (m/f) for VR projects using Unreal Engine 4.

As our Virtual Reality Programmer (m/f), you will have a great passion for 3D and VR games and how they work. You will be very interested in the current state of VR and will have gained development experience by creating your own innovative prototypes or products. You will have a good understanding of the technical and gameplay considerations necessary for successful VR developments.

In this role, the main responsibility is the implementation of gameplay features that match the quality and performance requirements. You will work closely with game designers and artists to implement gameplay behaviour.
