Job description

Internship Unity 3D Developer (f/m)

At Fluffy Fairy Games you will... Take ownership of everything you do. Be in an unique environment, a true no-bullshit meritocracy where your skills and efforts really make a difference. Build fast and ship faster. Try hard and learn harder. Grow with every problem encountered. Be paid at industry level. Have access to management all the time.

And you will not... Get your game killed in an intransparent gate process. Wait a week for a management decision. Compromise on a viable idea because of somebody else's gut feelings. Be surrounded by interns who shoulder much of the actual work without real pay or a chance

to land a job. Watch the lead engineer fiddle about for days in search of a perfect solution if a solid hack would have solved the problem. Et cetera. You get the picture.

□

Responsibilities

- Design technical concepts of new gameplay components
- Implement new features within the live release process
- Optimize existing game elements based on our players' feedback
- Develop tools to support the internal workflow (e.g. Unity Plugins, Telegram Bots)
- Come up with new ideas to improve our players' overall gameplay experience

□

Skills□

- Passion for games, especially mobile games and their development
- Highly motivated and reliable, well-organized work approach
- Ability to adapt and execute new work methods extremely fast and independently
- Very good knowledge of Unity 3D and C# (or similar programming languages)
- Enjoy working and knowledge exchange in small teams

□

Join our team□ In Karlsruhe & continue your career with us in Berlin starting January 2018. We offer free fruits & snacks, a lot of Club Mate and coffee!

Please send your full application (CV, cover letter, work sample, certificates) to Sophie at jobs@fluffyfairygames.com
