Job description

Data Analyst Working Student (f/m)

At Fluffy Fairy Games you will... Take ownership of everything you do. Be in an unique environment, a true no-bullshit meritocracy where your skills and efforts really make a difference. Build fast and ship faster. Try hard and learn harder. Grow with every problem encountered. Be paid at industry level. Have access to management all the time.

And you will not... Get your game killed in an intransparent gate process. Wait a week for a management decision. Compromise on a viable idea because of somebody else's gut feelings. Be surrounded by interns who shoulder much of the actual work without real pay or a chance

Games-Career.com is a service provided by:

to land a job. Watch the lead engineer fiddle about for days in search of a perfect solution if a solid hack would have solved the problem. Et cetera. You get the picture.

□

Responsibilities
