### Job description

#### **Game System Designer (f/m) Focus on balancing**

**At Fluffy Fairy Games you will...**  take ownership of everything you do. Be in a unique environment, a true no-bullshit meritocracy where your skills and efforts really make a difference. Build fast and ship faster. Try hard and learn harder. Grow with every problem encountered. Be paid at industry level. Have access to management all the time.

**And you will not...**  get your game killed in an intransparent gate process. Wait a week for a management decision. Compromise on a viable idea because of somebody else's gut feelings.

Games-Career.com is a service provided by:

Be surrounded by interns who shoulder much of the actual work without real pay or a chance to land a job. Watch the lead engineer fiddle about for days in search of a perfect solution if a solid hack would have solved the problem. Et cetera. You get the picture.

☐

### Responsibilities

- Define the games' vision and feature set in collaboration with our young & motivated team
- Create compelling idle game systems -including data structures- in a fast and agile development process with weekly updates
- Focus on balancing in-game economy values
- Implement & improve our monetization features
- Research & stay up to date with other mobile / idle games

☐

### Skills

- Solid experience in game design, preferably F2P mobile games
- Strong analytical & mathematical skills
- Advanced knowledge of Microsoft Excel
- Player-centric mindset and a sense for great user experience
- Knowledge of Unity3D is an advantage

☐

**Join our team** ☐ in Karlsruhe & continue your career with us in Berlin starting January 2018. We offer free fruits & snacks, a lot of Club Mate and coffee!

Please send your full application (CV, cover letter, work sample, certificates) to Sophie at [jobs@fluffyfairygames.com](mailto:jobs@fluffyfairygames.com)
