Job description

Your role @ Travian Games:

- Running the entire IT infrastructure (private cloud, TCP/IP network, provisioning tools, virtualization) with more than 1,700 virtual servers
- Monitoring, optimizing and safeguarding highly available high-traffic websites
- Further developing in-house systems for increasing efficiency and automating business processes in system administration
- Reviewing disruptions as well as analyzing and implementing optimization measures
- Evaluating and introducing new technologies (e.g. containers)
- Setting up and optimizing continuous deployment

Your profile:

- Successfully completed a degree or vocational training in computer science or a similar field
- Extensive professional experience in the areas of DevOps, IT infrastructure or IT operations
- Excellent proficiency in the system administration of Linux and a configuration management tool (e.g. Puppet)
- Basic programing skills in one of the following languages: Bash, Perl and Python
- Highly motivated team player as well as independent and service-based approach to work
- Good writing and speaking proficiency in German and/or English

☐

Why Travian Games?

- We work in a modern and creative office environment in the green city of Schwabing
- We take individual responsibility seriously: less hierarchy, more fun
- Our employees are able to choose their operating system and hardware themselves
- We offer many interesting tasks and projects, such as e.g. container computing

☐
