Job description

Your Crew

Our Switch Group brings awesome games to new platforms. A focus on getting tasks done while not breaking existing things is very important. Together with your team you will work on challenging game projects and famous IPs like Saints Row and Dead Island with a strong focus on technology and different platforms.

Mission Briefing

You will take an existing game and evolve its underlying technology to support a new platform.

You are able to jump quickly into an existing project and make sense of it.

Once the code is understood, you apply the required changes without unexpected side effects.

When the game runs on the new platform, the real work begins. It's time to debug and fix any bugs.

Also, you will have to optimize the game's performance, loading times, game size and so on.

And do not be afraid to touch the toolchain. Often, you will have to change game and tools in conjunction.

Skillset

- Very good knowledge of C++
- Experience in working with 3D APIs (e.g. OpenGL, Direct3D, Metal, Vulkan)
- Console development experience is a plus
- Excellent math skills
- Ability to navigate an existing code base
- Self-starter who works well across the team and supports other disciplines
- Extensive experience in software optimization
- Very good debugging skills
- Good knowledge of the English language
- Use of at least one scripting language (Python, Lua, Perl...)
- Participation in the development of at least one commercially successful video game
- Knowledge of multi-threaded programming

Mission Support

- *Here's to you!* Fresh fruit, free beverages and special conditions for gym membership
- *Do it!* Personal responsibility, freedom and short decision-making routes
- *The Unit!* Open office, friendly atmosphere and with professionals always willing to lend a hand
- *There you are!* Centrally located, bright and modern offices where creativity flourishes
- *Have Fun!* Of course play some games along the way
- *And what else!?* Learn more about your new professional homebase

☐

We are looking forward to your application. To give us a more extensive
first impression of you, a substantial application will be appreciated. The
minimum content should be a short motivation letter and your CV. If
you have questions regarding the application just drop us an e-mail at jobs@dsfishlabs.com
. An application via our online tool is preferred.
