## Job description

With your passion for games, you will work on the frontend of a brand new mobile game. In close collaboration with our artists, game designers and UI experts you bring gameplay features into our game and ensure high quality and an awesome gaming experience for our future players.

☐

## RESPONSIBILITIES

- Work on the frontend of a brand new Unity WebGL game
- Bring gameplay features with all multimedia aspects into our game
- Work closely together with our Art, Game Design and UI experts
-

Be in charge of forming and integrating the UI elements together with our UI designer
- Handle challenges with performance and memory limitations
- Prioritize, multi-task and perform in a deadline oriented environment
- Provide guidance and mentorship to junior team members
- Support your lead by helping him to scope and break down tasks, define workflows and design systems

☐

## REQUIREMENTS

- 5+ years of professional experience in developing video games
- Extensive knowledge in programming languages like C#
- Profound Unity3D experience
- Experience with object oriented design as well as fluency in architectural patterns like MVC
- Knowledge in creating UI while having a good understanding of UX
- You successfully worked on at least one shipped social / MMO project with a large amount of players or a realtime multiplayer game
- Knowledge of how to scope and break down requirements into actionable tasks
- Experience with WebGL and Java (backend) is a big plus
- Good problem analysis skills and ability to find simple, robust and efficient solutions for complex problems
- Management / lead experience is a plus
- You are a team player who enjoys working with other departments on shared goals
- Passion for games
- Fluent in written and spoken English
