Job description

We are looking for a motivated and passionate PHP Developer that develops, maintains and continuously enhances our Payment systems and their integrations in our games. In ambitious projects you will build and maintain a high-value payment and shop system as PHP Developer in a multi-disciplinary team. With your experience, preferably from previous web developments, you are able to provide a strong technical background and motivated to create great games!

☐

RESPONSIBILITIES

- Work on the backend of a browser-based high-quality shopping platform
-

Build and extend a shop system, and shape its future
- Create and maintain the payment structure, persistency and logic
- Develop and improve architectures, pipelines and processes along the way
- Create and maintain the codebase as well as work with developers from different departments
- Tackle larger tasks, plan and develop engineering solutions, specify and communicate these tasks
- Prioritize, multi-task and perform in a deadline oriented environment

☐

REQUIREMENTS

- University degree in the fields of Computer Science, Computer Engineering or comparable qualification
- 3+ years of professional experience in developing online backend systems
- Extensive practical knowledge of PHP in a professional environment and a deep understanding of the language and its specialties
- Advanced and disciplined OOP programming skills with state-of-the-art knowledge and experience in system design and architectures
- Experience with frameworks and databases (e.g. MySQL)
- Proven experience in code versioning (e.g. with SVN, GIT)
- Additional experience with other languages (e.g. Java/C#/ActionScript) is a plus
- Good problem analysis skills and ability to find simple, robust and efficient solutions for complex problems
- Team player who enjoys working with other departments on shared goals
- Passion for games
- Fluent in written and spoken English
