Job description

Gamers play games across many platforms. Mobile offers unique ways to play that a gamer can carry with them. Help our games be more social and connected across Messenger platforms.□

Let's enable people to play together with their friends.

□

RESPONSIBILITIES

- Work on Messenger platform games
- Bring gameplay features into our games
-

Games-Career.com is a service provided by:

Help ensure efficient game performance

- Be on board during the preproduction and take part in actively shaping these products
- Support your team by helping to scope and break down tasks, define workflows and design systems
- Provide guidance and mentorship to junior team members
- You prioritize, multi-task and perform in a deadline-oriented environment

□

REQUIREMENTS

- University degree in the fields of Computer Science, Computer Engineering or comparable qualification
- 5+ years of professional experience in developing video games
- Extensive practical knowledge of at least 2 programming languages in a professional environment such as PHP, Java, Javascript or C#
- Profound programming skills with best-practice knowledge
- Successfully worked on Mobile games and/or HTML5/Javascript games is a plus
- Experience with game engine middleware on multiple platforms such as Cocos Creator and/or Unity is a plus
- Experience in graphics programming is a plus
- Good problem analysis skills and ability to find simple, robust and efficient solutions for complex problems
- Management/lead experience is a plus
- You are a team player who enjoys working with other departments on shared goals
- Passion for games
- Fluent in written and spoken English
