## Job description

**VR Studio & Entertainment Center is looking for a backend developer**

(m/w/x) (full or part time, from now on)

### About us

☐ We are Exit Adventures, an owner-managed studio for virtual reality content in Berlin. Since 2016, we develop, operate and distribute multiple award-winning location-based multiplayer

Games-Career.com is a service provided by:

VR games. In addition to our studio in Berlin - Mitte, we look after an 800 square meter entertainment center with various game concepts.

To bring our innovative concepts to players around the world, we have developed a licensing system and have contracted over 25 locations on 4 continents after just one year. We are looking for a C # & C ++ developer for the extension of our VR content.

### **Your Responsibilities**

- Setting up a backend system for our customer management, licensing and data tracking system for our location-based VR games
- Developing a REST or WebSockets API for accessing the backend services
- Working on data tracking visualization that actively helps our game development
- Developing new features based on specifications
- Writing clean, clear, comprehensible, documented and performance-optimized code
- General suggestions to enhance the product (software architecture, UX/UI etc.)
- Systematic testing of modules on your own and in cooperation with designers and testers, as well as evaluating the results and giving proposals for eliminating problems

### **Your Qualifications**

- At least three years of work experience in programming
- In-depth experience with Python
- Experience in designing REST-APIs or WebSockets or similar
- Experience with SQL databases like MySQL or Postgres
- Ability to meet deadlines
- Ability to work well in a team

### **Nice-to-have Qualifications**

- Experience with Django, Django REST or Django Channels
- Experience with Docker Containers
- Experience with Grafana or other chart visualization frameworks
- Experience in the games industry
- Experience in Virtual Reality
- Experience with Version Control Tools like Git or SVN
- Experience with Scrum or Kanban
- Proficiency in German is welcome but not required

### **What We Offer**

- Working on a wide spectrum of tasks
- Having the chance to gain experience in the very current topic of virtual reality
- Having fun as part of a passionate team
- Being in the middle of Berlin

Please send us your CV to: [jobs@exit-vr.de](mailto:jobs@exit-vr.de)
