Job description

As a Senior Full Stack Engineer, you work in a cross-functional team within our Central Technology department. Your team develops and operates the stack used by our games. Additionally, you support and consult the integration of new games into our stack. As generalist you enjoy both, ensuring availability & performance of the stack and collaborating with the game teams. With your expertise, you create an awesome development and game operation experience.

You focus on your expertise (dev / devops or ops). Additionally you are interested and knowledgeable about at least one of the other areas.

Sounds great? Then check if you've got the skills required ☐ and ☐ apply! We're always looking to add perceptive, hard-working ☐ and ☐ friendly people to our family!

☐
