Job description

As a **Senior Java Software Developer**, you work closely with our game teams to shape the foundation of our next big hits and contribute as a productive member of an agile development team in all phases of the development lifecycle. Become the champion for best practices for all of our game backend developers!

Your mission:

- Develop features shared across our game backends
- Improve performance-critical components, increase the robustness and scalability of our software
-

Games-Career.com is a service provided by:

QUINKE NETWORKS
Quinke Networks GmbH
Bei den Mühren 70
20457 Hamburg / Germany

Improve our libraries and backend services with your knowledge of software architecture and high-quality code
- Maintain and extend our development tools and environment

☐

Your Profile:

- Degree in Computer Sciences, Business Information Systems or an equivalent training and experience as IT specialist
- Several years of experience in object-oriented programming in Java with Spring Boot and the Akka framework
- Software development with Spring, the UNIX command line and profound knowledge of SQL, GIT, and Continuous Delivery
- Solid experience in using various methods in software design and strong belief in automated testing to guarantee and improve code quality in compliance with the company standards
- Being a backend geek, you also sometimes like to switch to the frontend side with Angular, C# and Unity
- Good English language and overall communication skills
- Proactive and motivated individual with a willingness to learn

Why join us?

- Be part of a great international team in a healthy and stable growing company
- Choose your preferred device (Linux, Mac or even Windows) to set-up your favorite workplace
- We actively support your further development and give you all needed resources to evaluate new technologies and participate in open source communities
- We provide additional training budget to spend on attending conferences, taking hard skill courses or improve your soft skills as well as purchasing books
- Our career model is set up equally for an expert in a technical career or a management path
- Use opportunities to make your code open source and show your achievements at international conferences
- We offer competitive compensation with benefits like relocation support, company gym, smartphone or tablet, company bikes, rooftop terrace with BBQ and much more

☐

Excited to start your journey with InnoGames and join our dynamic team as a **Senior☐Java Software Developer**? We look forward to receiving your application as well as your salary expectations and earliest possible start date through our online application form. **Isabella Dettlaff** would be happy to answer any questions you may have.

InnoGames, based in Hamburg, is one of the leading developers and publishers of online games with more than 200 million registered players around the world. Currently, more than 400 people from 30 nations are working in the Hamburg-based headquarters. We have been characterized by dynamic growth ever since the company was founded in 2007. In order to further expand our success and to realize new projects, we are constantly looking for young
