Job description

We are looking for a skilled Data Analyst who wants to support us in providing information that will improve our games. We're looking for people who love the idea of working together in interdisciplinary teams and a fast-paced and professional environment.

Responsibilities

- You create and provide on-going reports and monitor the performance of our games
- You transfer complex mathematical relationships into actionable dashboards, presentations and talks; you edit large amounts of data in visually concise and comprehensible ways
-

Games-Career.com is a service provided by:

You define, create, and implement complex quantitative models for projection to evaluate user behavior, and you identify the decisive predicting variables for successful customer retention steps

- You evaluate A/B tests and multivariate tests to optimize mission-orientated decisions
- You work closely with other stakeholders, e.g. Design, Product Management, Publishing, etc.

☐

Qualifications

- 3+ years experience as a data analyst / scientist or in a similar position, preferably in the gaming industry
- University degree or comparable qualification with a statistical / mathematical background
- Able to apply machine learning algorithms for the development and implementation of new analysis tools
- Experience in working with SQL, R/Python and MS Office
- Experience in data visualization like e.g. Tableau, QlikView or any equivalent
- Natural enthusiasm for quickly and independently learning new technologies
- Ability to communicate effectively in English, both verbally and in writing
- Passionate about videogames

☐

Desirable skills

- Experience in the development of data and analytics infrastructure

☐

Employment details

- Full-time and on-site
- Status: employment
- Start: asap

☐
