Job description

We are looking for a programmer to help us develop next level VR applications and games for desktop and mobile platforms in the fields of health, fitness and entertainment. You will contribute your own creativity to the design process while developing new features for our games, as well as maintain and improve the existing code. If creating experiences that delight end users sounds exciting to you, and you would like to become part of our dynamic team as a Game Developer, we look forward to receiving your application!

☐
