Job description

Three years ago in a student flat in Karlsruhe we dreamed of becoming the most player-centric games developer in the world. Fast forward to 2019: We're now a team of more than 100 people in our studio in Kreuzberg, Berlin, and our two mobile games 'Idle Miner Tycoon' and 'Idle Factory Tycoon' have reached more than 100 million global downloads.

Our vision remains, and we want you to become a part of it! Help us in bringing joy to the people who love our games and join a company that has plenty of fun while doing so.

DevOps Engineer (f/m/d)

Quinke Networks GmbH
Bei den Mühlen 70
20457 Hamburg/Germany

□

We are looking for a passionate engineer, whose skill set is combining the best of both development and IT operations, to join our IT Infrastructure team. You will be responsible for taking the infrastructure of a fast-growing startup to the next level. Ideally, you already have 1-2 years of experience with working as either a DevOps Engineer or full-stack developer in an agile environment.

Reporting to our Head of IT Infrastructure, you will work as part of a small, young, and passionate team which is eager to learn and adapt to new ideas and technologies. You will have the chance to play a key role in the decision-making process and, hence, put your experience into practice.

□

Responsibilities

- Build and maintain CI / CD pipelines so our game developers do not need to worry about build or deployment processes
- Identify repetitive and tedious tasks and design solutions for streamlining them to make work more comfortable and efficient - for everyone
- Develop our system architecture to the next level by increasing performance, reliability, and scalability
- Work closely together with other teams in the company to create new tools for enhancing their workflows
- Use your experience to participate in strategic decisions and coach other members in the team

□

Required skills

- You have at least one year of experience in the field of DevOps
- You are proactive, self-directed and organized
- You are aware of industry best practices and have the ability to apply the right solution for a given problem
- You have in-depth experience with Jenkins or a similar CI/CD framework
- You are fluent in C# or another general-purpose programming language and are familiar with software architecture and design patterns
- You feel comfortable with the command line and know Linux well - GUIs are optional for you
- You speak Kubernetes and it is your choice for deploying microservices
- You have a basic understanding of how to develop and deploy mobile apps

□

Desirable skills

- You have worked with Unity and know about serialization and the asset workflow
-
