## Job description

We are looking for a Game Development Team lead with a passion for leading a product team into delivering successful web-based games and games integrations, to join Esport-Management at their Berlin, Germany office.□

Esport-Management is an online platform designed to find and raise the next generation of esports athletes. This SaaS platform equips grassroots, amateur and semi-pro players with performance, growth and management tools needed to advance into a professional esports career and gain visibility among esports organizations that seek esports talent.

Esports is a rapidly growing market with [Newzoo predicting](#) that this year the global esports market will generate revenues of \$1.1 billion, up +26.7% year on year.

Games-Career.com is a service provided by:

After a highly successful startup and funding phase, Esport-Management is now poised for rapid growth and this role will be of pivotal importance. This position reports directly to the CTO.

### **Job Responsibilities:**

- Deliver high quality web based training games
- Lead by example on world class engineering quality standard
- Evangelize and inspire an Agile approach
- Ensure that Test driven development and other extreme programming techniques are embraced by the tea
- Line management on team members, team dynamics and productivity
- Establish best practices and then ensure they are followed by your tea
- Manage and communicate on the product road map, make the team's velocity transparent and predictable.

### **Job requirements:**

- Creative, curious, problem solving and analytical mind with a passion for esports, gaming and geek culture.
- Hands on senior engineer with strong technical skills. You will be coding 70% on your time.
- Senior Engineering skills with a strong Javascript experience or standard gaming technology (C++, Java, Unity etc...)
- Has led and worked in an international agile engineering department
- Experience in working at scale
- Open source contribution is a plus
- At least 5 years of experience in a similar role, 10 years as a Software Engineer
- Ability to work in a multinational and multicultural environment
- Ability to work in a rapidly evolving work environment

Games-Career.com is a service provided by:

- Fluent in English, both spoken and written. German and French a plus
- Ability to work in (and, if necessary, relocate to) Berlin, Germany

### **What we offer**

- An opportunity to join a fully funded startup at a very exciting time of growth.
  - Industry-standard remunerations.
  - A great opportunity to be fully focused in building high quality products in a very agile environment.
- ☐

For this vacancy we only consider candidates that are eligible to work in the EU (no visa required).

☐

Are you interested and do you fit above profile? We love to hear from you!

We only take your application in consideration when you apply with a CV and motivational letter.
