### **DevOps/Build Engineer (f/m/d)**

We are looking for a passionate engineer, whose skill set is combining the best of both development and IT operations, to join our IT Infrastructure team. You will be responsible for taking the infrastructure of a fast-growing startup to the next level. Ideally, you already have 1-2 years of experience with working as either a DevOps Engineer, Build Engineer or full-stack developer in an agile environment.

Reporting to our Head of IT Infrastructure, you will work as part of a small, young, and passionate team which is eager to learn and adapt to new ideas and technologies. You will have the chance to play a key role in the decision-making process and, hence, put your experience into practice.

□

### **Responsibilities**

- Build and maintain CI / CD pipelines so our game developers do not need to worry about build or deployment processes
- Identify repetitive and tedious tasks and design solutions for streamlining them to make work more comfortable and efficient - for everyone
- Develop our system architecture to the next level by increasing performance, reliability, and scalability
- Work closely together with other teams in the company to create new tools for enhancing their workflows
- Use your experience to participate in strategic decisions and coach other members in the team

□

### **Required skills**

- You have at least one year of experience in the field of DevOps or Build Engineering
- You are proactive, self-directed and organized
- You are aware of industry best practices and have the ability to apply the right solution for a given problem
- You have in-depth experience with Jenkins or a similar CI/CD framework
- You are fluent in C# or another general-purpose programming language and are familiar with software architecture and design patterns
- You feel comfortable with the command line and know Linux well - GUIs are optional for you
- You speak Kubernetes and it is your choice for deploying microservices
- You have a basic understanding of how to develop and deploy mobile apps

□

### **Desirable skills**
