Job description

Your responsibilities:

- Creation of appealing game content and game mechanics (mobile strategy and role-playing games)
- Preparation and maintenance of comprehensive game design documents (German & English)
- Preparation of Excel documents and balance game elements with those
- Optimization and creation of game mechanics for the user retention and monetization
- Competitive analysis and presentation of feature proposals
- Close collaboration and consultation with the whole game development team

☐

Required skills:

- Experience with (mobile) role-playing and / or strategy games
- Mathematical understanding of game mechanics and their relations
- Studies ideally in game design or (media) computer science courses
- Competent handling of presentation and spreadsheet programs (Excel, Powerpoint etc.)
- Good knowledge of German and English, both spoken and written

☐

We offer:

- A challenging, yet promoting working atmosphere
- Responsible tasks
- A team-oriented working process, visibly incorporating the results of your work
- Close cooperation with our Game Design Director who will support you in your professional and personal development
- Unique expertise in the development of cross platform games
- A modern, young work environment including free fruit and beverages
- HVV ProfiTicket subsidy

☐

If you are interested in this unique opportunity, please send your complete application including salary expectations and 1-2 game design documents in a PDF file to jobs@xyrality.com. We would appreciate information, where our job advertisement caught your attention.
