### Job description

SoftSunSimulations (3S), a young Munich-based startup company for learning simulations in the field of "gaming" is looking for a game / 3D designer who is either at the end of his studies - or up to a maximum of 5 years after successful completion.

☐

In the context of science, we are developing a "Puzzle Detective Game" in the pixel art style including a few other styles and technologies - as an "initial project". The game idea and all the necessary resources are already available, but still require active support in the area of design and 3D.

☐

Below are the skills that are sought for this:

Low poly 3D modeling

Texturing / UV mapping

Games-Career.com is a service provided by:

3D animation  
Scene building  
Potentially sprite animation  
2D isometry pixel art

Sprite animation

☐

In addition to a salary, there is also a share of up to 20% of the income in this project. You can also work on the project in a homely atmosphere. Gender doesn't matter!

☐

We are only looking for this one position for the project - in the shortest possible time. The duration of this project is a maximum of 1 year for the demo phase, or 2 years until full development.

☐

>> Be talented, motivated, ambitious and structured. Team oriented, with reliable time management. Let your imagination run wild and surprise us with your arts - there is a lot to do! <<

☐

If you can get excited about this thing, if you see yourself suitable for it and say "This is exactly my thing!" - please write a meaningful e-mail with your application and your CV (in which your skills are clearly shown) to: jobs @ softsunsimulations.com.

☐

☐

We look forward to your applications!

☐

☐
