Job description

RetroBrain R&D has been developing therapeutically and preventive video games for dementia patients and healthy senior citizens since 2014. Our 22-strong, interdisciplinary and age-diverse team is jointly developing and establishing the memoreBox, the eHealth solution from RetroBrain. Since 2015 it is considered "a benchmark in the therapeutic gamification industry" (LIFT Basel). The memoreBox reduces the effects of age-related diseases such as dementia, reduces the risk of falls and promotes inclusion in retirement homes through joint activities. □

We are looking for a full-time colleague (40 hours per week) to join us as

Senior Unity Front End Developer (f/m/d)

□
