Job description

Would you like to leave a mark in the landscape of games while working in a fast-paced and hyper-creative environment and with people who are passionate to create an awesome game experience together?

We are looking for a talented ☐Principal Game Engineer☐with strong Unreal background and broad technical knowledge to join the talented team behind our games.

In this role, you will be working directly with the Technical Lead with significant ownership and responsibility. As a ☐Principal Engineer, you hold a great scope of influence on the product to ensure that the technical team produces high-quality game features for our game. You are expected to lead by example willing to carry out game engineering discipline work in a clear and maintainable internal standard.

Games-Career.com is a service provided by:

We believe the best games are made by diverse teams and welcome applicants from all backgrounds.

Responsibilities

- Support the Technical Director by guiding other engineers and maintaining best practices, development processes, and quality standards
- Design and implement well-engineered, reliable, maintainable solutions
- Spot potential problems and recognize opportunities to improve our games or general workflows and seek to make these changes
- To guide us on technical solutions and be on top of the latest technologies and development in the industry that enables you to improve the game and our work
- Work with an interdisciplinary agile team to design, prototype, and implement new gameplay features
- Mentoring and taking part in the hiring

Qualifications

- 5+ of programming experience in game development with at least one title shipped game title
- Worked on multiple games and experienced in different areas of game development including but not only:
Gameplay code, AI and animation, etc; online services, backend; build pipeline and automation
- Excellent C/C++ programming skills with utilization of solid software engineering practices
- Strong in problem-solving and ability to identify problems and define priorities
- Strong expertise working with Unreal Engine 4
- Past experience in mentoring and hiring
- Proven ability to collaborate with different disciplines to discuss designs with respect to technical challenges
- Self-motivated and self-directing, knowledgeable about and willing to pitch and present relevant topics
- Ability to communicate effectively in English, both verbally and in writing

Employment details

- Full-time
- Status: employment
- Start: as soon as possible

Benefits
