Job description

Would you like to be part of a 3rd person shooter, a new IP packed with innovation and leave a mark in the landscape of games while working together in interdisciplinary teams and a fast-paced and hyper-creative environment?

We are currently seeking a talented and passionate **Online Game Engineer** to support our team working on the **online features** for our unannounced game. The gameplay experience is a unique blend of third-person shooting & melee combat, in an open world that lets you choose your own goals, together with others.

You will join in an exciting phase when you can make an impact on the game. You will be part of an experienced team that has a lot to offer and encourages you to grow with us together!

Games-Career.com is a service provided by:

We believe the best games are made by diverse teams and welcome applicants from all backgrounds.

Responsibilities

- Implement features and solutions, both on client and backend, covering our tech stack from UE4 communicating to Playfab and Azure infrastructure
- Write clean and maintainable C++ and C# code
- Research new technologies and tools that will help us run our live services with high availability and scalability
- Integrate third-party platform services and SDKs
- Investigate technical issues impacting the game during development and live service
- Write technical specifications, technical design documents, and other relevant documentation

Qualifications

- 2+ years of experience working on live games, on PC, mobile and/or console platforms
- Experience implementing online services, such as In-app purchases, authentication, leaderboards, live events, Meta and progression, matchmaking and analytics
- Fluent in C++, C# (or similar languages)
- Experience working with backend technologies, either in-house or BaaS, in a serverless architecture
- A passion for video games, and a general understanding of the industry and game design principles

Desirable skills

- Experience with PlayFab, Azure Functions, SignalR, Redis
- Experience with UE4, including UMG & Blueprints
- Experience implementing game systems and features, such as UI and gameplay

Employment details

- Full-time
- Status: employment
- Start: as soon as possible
