Your mission

- You implement the frontend of a new mobile game
- You add connection to the backend and support its development
- You manage the development pipeline and take care of documentation
- You are part of a small, cross-departmental team

Your skills

- You have a very good and professionally proven knowledge of mobile game development in Unity
- You are skilled in C# and know how to work with dependency injection (e.g. Zenject) and networking (e.g. REST, async/wait)
- You have experience in the Unity UI toolkit and can create UI fast and easily according to product requirements
- You are passionate about blockchain technology in general and NFT or smart contracts are not just buzzwords to you
- You live for online games and know the ins and outs of mobile gaming
- You know how to handle complex tasks without losing your cool
- You keep a cool head and can easily adjust to changing situations and modify existing processes

Your Gameforge setting

- An international company awaits you! English is our company language, as employees from over 25 nations are part of our team
- The future's hybrid! Together with your manager and team, you can arrange how you split your time working from home or at the office
- Where colleagues become friends! Regular team events and an open company culture
- Enthusiasm is in our DNA! Each and every one of us shares a passion for play
