Job description

About the Position

As a Java Server Developer (m/f/d), your job is to maintain our Java Game Server, develop new features, and implement new games.

About Us

Spiele-Palast GmbH offers online card games for browsers and mobile devices. Hundreds of thousands of active players use our platform every day to stay in touch and play card games together. We aim to build the best platform for card games from all over the world.

Entry Date

immediately

Form of Employment

full time

What we Offer

- Work within a small and dynamic team in the heart of Berlin.
- Join for one of the most successful app studios in Germany.
- Develop a product that thousands of people are using at any given time.
- Low hierarchies and quick decision-making help you to work swiftly and efficiently.
- We work with flex time.

Area of Responsibility

- Take on our game server's development.
- Work closely with our front-end team to add new features and games to our online multiplayer platform.
- Develop new components, such as live tournaments, leveling, and clans.
- Independently analyze requirements, based on which you plan an efficient and performant implementation of a multithreading architecture.
- Implement improvements in the software and our substitute player AI based on user feedback.
- Depending on your profile and interests, you look into additional topics, e.g., our customer service interface or game replays.

Requirements

- You have at least 3 years of experience with Java.
- You provide a profound understanding of multithreading in Java.
- Creating clean and maintainable code based on the company standards is a matter of course for you.
- Essential experience with JUnit, JavaDoc, Git, and Ant/Maven is required.
- A gaming background is desirable.
- Experience with SmartFoxServer and Linux is a plus.
- Your written and spoken English skills are very good up to native.
- Good German skills are an advantage.
