20457 Hamburg/Germany

☐

YOUR QUESTS

☐

- Design and implement well-engineered, reliable, maintainable and bug-free applications and systems as part of the development team of our major Mobile games
- Lead a small team of Unity Engineers to develop new features and components for iOS and Android
- Build sustaining systems, suggesting new ideas, concepts and provide feedback
- Review code of internal and external team members to ensure proper integration of application features while preserving artistic integrity and performance
- Keep up to date on state-of-the-art methods, practices, and technologies
- Work with Agile Scrum Methodology in a team setting on a daily basis to complete the assigned development tasks

☐

YOUR GEAR

☐

- Bachelor's degree in Engineering, Computer Science or equivalent professional experience
- Minimum five years of game engineering experience
- Shipped at least two titles in the games industry, with at least one mobile game
- Very strong C# Unity skills in a Game development environment.
- Strong knowledge of development for iOS and Android platforms
- Strong time management skills with the ability to multitask across disciplines, assess risk, define priorities, and resolve problems while meeting deadlines
- Fluent in English with strong written and verbal communication skills
- Excellent critical and analytical skills

☐

BONUS POINTS FOR

☐

- Front-end and back-end software development skills with both client and server code management
- Experience of leading/coaching a small team of engineers/programmers

☐

YOUR REWARD

☐

- Creating new games within a new mobile studio
- Multiple company benefits to choose from, in a Cafeteria system, that
