Job description

ABOUT FLYING SHEEP STUDIOS

We craft truly frictionless games for the metaverse.

Flying Sheep Studios is a game company of 20 people with great ambitions that has already shipped over 200 crossplatform webgames. Since joining the iCandy group, we have been focussing on building social virtual worlds to contribute to the Metaverse.

Even though we have an office located in the Cologne Game Haus, right in front of the Gamescom location, our team may work remotely from anywhere in Germany. □

We have built our company culture based on the following beliefs:

Games-Career.com is a service provided by:

□

Diversity is the key to more creativity and better problem solving. Our team is currently composed of people of 6 nationalities and over one third female team members. Our company language is English. If we enjoy ourselves while making our games, this will translate into more fun games for our players. So we make sure to keep a harmonic atmosphere, and have regular voluntary team events

(LAN parties, board game nights, karaoke etc...)

□

Continuous improvement of our processes enables us to deliver games without unnecessary stress. We are never satisfied with the status quo, therefore we use every opportunity to learn and improve our skills and processes, to enable us to meet all deadlines without having to crunch.

This is important for our last point because...

□

... we believe that a **healthy work-life balance** is essential for an enjoyable work environment. Not only have we been able to avoid crunch completely for the 8 years of our existence. We also offer flexible working time, flexible working place (Cologne office or anywhere else), and overtime is compensated in free-time.

If these values fit your own expectations of a desirable workplace, then here is your chance to join our team!

□

TASKS

- Contribute to an ambitious web3 game from the get-go
- Design, deploy and maintain scalable, secure infrastructure for a large-scale web game
- Develop and maintain our CI/CD pipeline
- Provide monitoring and alerting to efficiently identify and fix issues
- Work independently in cooperation with a team of experienced web game developers
- Last, but not least, contribute directly to game development

□

YOUR PROFILE

- Experience with Linux and cloud infrastructure (AWS, GCP, etc.)
- Experience with CI/CD
- Strong focus on security
- Strong knowledge in at least one programming language
- Fluent in written and spoken English
- Game enthusiast
-

Games-Career.com is a service provided by:
