We are currently seeking a talented and passionate Senior Engineer - Online to support our team working on the online features for The Cycle: Frontier, a F2P multiplayer shooter packed with innovation. You will join in an exciting development phase and be part of an experienced team that has a lot to offer and encourages you to grow with us together! The ideal candidate is a Game Engineer who has extensive experience working on live, online games with a strong dedication for making great games.

YOUR MISSION

- Implement features and solutions, both on client and backend, covering our tech stack from UE4 communicating to Playfab and Azure infrastructure
- Write clean and maintainable C++ and C# code
- Research new technologies and tools that will help us run our live services with high availability and scalability
- Integrate platform services and SDKs, such as Steam, EGS, PSN and Xbox Live
- Support running a 24/7 live game, following On-call schedules and investigating live incidents
- Write technical specifications, technical design documents, and other relevant documentation
- Mentor junior and regular engineers, run technical interviews and own a significant part of our online infrastructure

YOUR SKILL TREE

- 6+ Years of experience working on live games, on PC, mobile and/or console platforms
- Experience implementing online services, such as In-app purchases, authentication, leaderboards, live events, Meta and progression, matchmaking and analytics
- Fluent in C++, C# (or similar languages)
- Experience working with backend technologies, either in-house or BaaS, in a serverless architecture
- Experience implementing game systems and features, such as UI and gameplay
- Experience with cloud infrastructure on any of the major providers (Azure, AWS, Google Cloud), including VPCs, SQL/NoSQL databases, and messaging/queue systems
- A passion for videogames, and a general understanding of the industry and game design principles
- Experience with Playfab, Azure functions, SignalR, Redis
- Experience with UE4, including UMG, Blueprints
- Experience with UE4 build system, and CI/CD (Jenkins, TeamCity or similar)
- Multiplayer game experience, including dedicated servers, UE4 replication and client prediction
- Experience with testing automation frameworks
