Description

Type of employment: Freelance
Entry date: immediately
Place of work: Remote

Hello! My name is Valeriya, and I am a professional artist and a graduate of B. A. Design. I work as a freelance illustrator, character designer and concept artist.

My main focus in my work is on fantasy and folklore, designing and painting fantasy creatures, animals and people. Other visual directions for backgrounds such as realistic landscapes, natural and city worlds can also be found in my portfolio. I prefer to work in a realistic style, sometimes with slight stylization; I'm also currently developing new projects in the comic art style.

As a trained painter, I have valuable knowledge and various art rules in the creation of a realistic and stylized image. With my experience from studying with a focus on media design, I already have an understanding of the media area with preparing a 2D concepts for 3D implementation. Selling my artwork for individuals and businesses, and private and corporate commissions for illustration and character design, I pride myself on my customer satisfaction and personal customer care.

If you are interested in my work, I am always at your disposal. I look forward to implementing your ideas and realizing great projects together with you.

Best regards,
Valeriya
